

Hurricane Preparations

- Did you know that power outages and heavy rains on the island can have an impact on your wastewater services? During poor weather conditions, you should limit your home's water usage to prevent excessive sewer discharge.
- JIPSD [Wastewater Services](#) maintains nearly 70 lift stations on the island. Through a remote monitoring system, we are able to receive alerts to any potential problem a lift station may experience.
- Please be aware that storm water drains are not maintained by JIPSD. Storm water systems are maintained by various agencies on the island. Typically, the agency that maintains the road also maintains the storm drain. Please see more information [here](#)!
- How can you prevent a wastewater backup in your home? Check our [brochure](#) for tips!
- JIPSD Wastewater Services can be reached 24 hours a day. Call 843-795-2345 for wastewater emergencies when our office is closed. We are always here to help!

During Hurricanes

- See a sewer problem? Hear an alarm? JIPSD Wastewater Services can be reached 24 hours a day. Call 843-795-2345 for wastewater emergencies. We are always here to help!
- JIPSD [Wastewater Services](#) maintains nearly 70 lift stations on the island. Through a remote monitoring system, we are alerted to any potential problem a lift station may experience. Please call us at 843-795-2345 if you have any urgent concerns!
- Power outages and heavy rains on the island may be impacting your wastewater services. Please limit your home's water usage to prevent excessive sewer discharge until the weather improves.
